Tips-n-Tricks

Here are some of my favorite go-to web sites. Some are informative, some are just for fun:

Car Defects and Recalls - find out if your car get's a free fix-up: Click [HERE](#)

Have a family member or friend flying into town? Track their flight in realtime: <http://www.flightview.com/>

Free PDF creator software: <http://dopdf.com>

Share files between multiple computers, over the Internet!: <http://dropbox.com>

Customer Corner

What's it like to be Jason at work?! Here's a peek into one of my typical support calls.

"My Internet is really slow!"

Overall, the computer is running fast - applications open quickly, printing is fine. However, whenever they launch any web browser, IE, Chrome or Firefox, web sites take forever to come up. I ran a [Speed Test](#) and it showed 8mb download speed, which is fantastic.

Rebooting the computer and router didn't fix it. I ran 'Task Manager' and it showed 'ietoolbar' taking 100% of the CPU processes. I then closed IE, opened Control Panel - Internet Options, deleted Internet temp files, and then reset to factory defaults.

Internet sites now open Fast! **Customer Happy - Me Happy :o)**
